

Gearbox Repair & Overhaul

EQUIPMENT: Gear Boxes

MACHINE TO SUIT: Lightnin, Krupp, Zollern, Sew, Falk, Bonfiglioli, Brevini, Flender, David Brown, Hansen and others

Geographe offers a true 'Turn Key' solution by maximising in house content. While our competition are often forced to wait for gears to be supplied to them, we are preparing your gearbox for despatch.

Gearboxes used in the mining, exploration and transport industries are often required to operate in demanding conditions. Geographe offers full services for the repair and overhaul of gearboxes and transmission systems that operate under extreme stress.

These include:

- Strip, assessment, reporting and quoting
- Failure analysis
- Re-assembly and surface treatment
- Testing
- Final inspection report- Full MDR available
- Ratio changes
- Directional change
- Gear manufacture
- Gear profile grinding
- Reverse engineering
- Housing fabrication

Geographe is experienced in the service, repairs and overhaul of a wide variety of OEM gearboxes. We pride ourselves on after sales service and 24 hour support.

Authorised Lightnin service centre

LightninTM
